Not that fun. But a bit. Would work better on a portable console.. The activation process is a humiliation towards the paying customer!

Resolution is not changeable to 1920x1080! This game is BAD! Don't buy it. I wasted my money here.... Please fix the knowing bugs and update game some new stuff. nice little arkanoid clone with a theme

- + decent gameplay
- + cute graphics
- + fitting sound effects
- + multiple paths
- + create your own levels

- bad dialog fillers. so bad.no control options.bad graphics.. One step forwards, two steps back. While the graphical update is nice, the physics and career mode are a huge step backwards.

Buy MXGP 3 instead. (Or Monster Energy Supercross if supercross is more your style.). An excellent benchmarking tool. You can find it out there for less than \$10, so this is very much worth picking up.. Great Meme! If you got some time to kill and like memes its not a bad game! :P

9/10 Wish it was longer but still not a bad game for the price. This is, unfortunately, a bad port of a very interesting game. Animations and audio are broken all over the place, and in some situations, this can impede gameplay as certain clicks wont register while a borked sound effect is attempting to play.

---

MacOS. You can finish this game in 2 hours without difficulty.. Very dull and repetitive game, with very, very dull and repetitive achievements that take ages to complete. They aren't hard, just very long and drawn out!. (Edit. played without the expansion)

An nice sci-fi story with realistic details, decent dialogue and some tense moments. 5ish hour to play through it.

It's let down slightly by the management side of the game, which felt promising but could have been balanced better and fleshed-out more. If you make the wrong decision early, you will have to reset. Once you figure out the formula and get a few buildings, managing stats like supplies become redundant.

(Edit. I just noticed that they have a 5 dollar expansion that reworks colony management and no doubt addresses the concerns I brought up... It's good that they fixed this stuff, but I don't think its right for them to charge for it, considering that colony management was touted as a core part of the base game, but was very threadbare. Since I know how the storyline goes, I don't feel like shelling out more money to play a more polished version...shame).. Game is extremely fast-paced, looks great, has co-op features and is a great game for the type of player that lives for the high scores.. **STOP TORTURING MY BRAIN WITH CONSTANT INTERRUPTIONS**

I really want to like this game, but I can't recommend it. The main problem is that **the game does not let you play. It keeps interrupting your fun with stupid crap that doesn't even need to be there. It really is a shame because the game looks very polished and well coded, but it fails at the design level.**

- + The core concept of the evolving, constantly moving tower defense is great <- Thats the fun part, devs!
- + The art style is unique and fun to look at
- + The goofy storytelling is enjoyable

- Most buildings in the game serve no purpose.

- Recycler - Why do I need to build a building to 'sell' other buildings?
- Printamp - I have to build the same thing eight times just to unlock other buildings?
- Maintainer - I'm supposed to cover the map with these to counter the most annoying game mechanic ever...
- The mechanic of printing buildings looks futuristic and cool at first but it really gets tiring. Let me explain why:
  1. You decide you want to build something over here
  2. Scroll back to the mothership and click the building icon
  3. Get distracted by something else while the building is printed
  4. Get your attention back to the building once it is finished printing
  5. Scroll back to the site you want it to be placed
  6. Get distracted by something else while it is flying there
  7. Make use of the building once it has landed
  8. Repeat this 3-4-5 times EVERY MINUTE
- The random building fog mechanic is the single most annoying, useless thing you can come up with. Why is it in the game???

Good ideas, sloppy design.. Nice little gem with great feeling of Amiga/C64.. Is meh - too simple, but that easy 100% game with decent achivments (flags and letters (also wierd letters and chinese)). i bought it and refunded it as fast as i could, thank god i was able to play some online matches.

If you want to buy it then buy it, just set up a timer and don't go over 3h, you will see for yourself how miserable this game is.
